CALL FOR PAPERS

The purpose of the conference is to bring together people from all branches of mathematics and science with interests in recurrence sequences, their applications and generalizations, and other special number sequences. For the conference Proceedings, manuscripts that include new, unpublished results (or new proofs of known theorems) will be considered. A manuscript should contain an abstract on a separate page. Please be advised that, if accepted, the papers will have to abide by the publisher's format style file available on the local webpage. For papers not intended for the Proceedings, authors may submit just an abstract, describing new work, published work or work in progress. The deadline for submitting papers and abstracts is May 1, 2010. Editors of the Proceedings are:
